WARRANTS ISSUED AGAINST MINERS

Twenty-five Officials and Members of Trinidad Union Indicted by Grand Jury.

Pueblo, Colo., Dec. 2.—The task of issuing warrants for the arrest of the twenty-five officials and members of the United Mine Workers of America, who were indicted last yesterday by the United States grand jury, was begun today but court officials here.

The indictments charge conspiracy to monopolize labor and conspiracy in restraint of interstate commerce.

The indictments followed several weeks' investigation of conditions existing in the Colorado coal fields where a strike has been in progress since September 23.

DECLARATIONS OF BANKRUPTCY ASKED
Salt Lake, Dec. 3.—Alleging that the Wright Rubber company of Salt

Lake, dealer in automobile supplies and general merchandise, has been insolvent for several months, and that while in this condition assignment was made November 10 to the United States Tire company of accounts amounting to \$1500, the Firestone Tire & Rubber company yesterday filed a petition in federal court asking that the local firm be declared bankrupt.

The petition declares that between October 15 and November 25, 1913, the indebtedness of the Wright Rubber company has totaled \$784.80, and that only \$258.76 of this has been paid. It claims that the assignment to the United States company showed preference to one creditor over others.

The Joseph Nelson Supply company yesterday applied to the United States district court for an order declaring David F. Walker, bankrupt Mr. Walker is proprietor of a barber shop in the New house building. The petition alleges that Walker's indebtedness to the Nelson company amounts to \$500 in excess of securities.

JACK WAS "ON."
"Alice is telling her girl friends she could have got Jack—if she'd only said 'Yes'."

"That's what Jack thought, so he never gave her the chance to say it."

OPENS UP NOSTRILS, CLEARS HEAD,
ENDS COLDS OR CATARRH AT ONCE

Instantly Relieves Swollen, Inflamed Nose, Head, Throat—You Breathe Freely—Dull Headache Goes—Nasty Discharge Stops.

Try "Ely's Cream Balm." Get a small bottle anyway, just to try it. Apply a little in the nostrils and instantly your clogged nose and stopped-up air passages of the head will open; you will breathe freely; dullness and headache disappear. By morning! that catarrh, cold-in-head or catarrhal sore throat will be gone.

End such misery now! Get the small bottle of "Ely's Cream Balm" at any drug store. This sweet, fragrant

balms dissolves by the heat of the nostrils; penetrates and heals the inflamed, swollen membrane which lines the nose, head and throat; clears the air passages; stops nasty discharges and a feeling of cleansing, soothing relief comes immediately.

Don't lay awake tonight struggling for breath, with head stuffed; nostrils closed, hawking and blowing. Catarrh or a cold, with its running nose, foul mucous dripping into the throat, and raw dryness is distressing but truly needless.

Put your faith—just once—in Ely's Cream Balm and your cold or catarrh will surely disappear.

LOPEZ HEARD IN THE MINE

Tapping on the Pipes Attracts Attention of Sheriff T. A. Devine.

Bingham, Dec. 3.—The Apex mine, will be opened tomorrow morning and the search will be made for the outlaw's body. On account of the fact that the mine is completely shut down and 225 miners are idle, the opening will not be delayed longer. Furthermore, it is not believed that Lopez if he is still alive, can withstand the deadly black damp that is now being sent up the hoist from the 700-foot level.

The latest report from the bandit was that which came last night from the Phoenix tunnel No. 2, the 975-foot level. Guards stationed there reported that they had heard Lopez working his way out at the inner bulkhead. There are two bulkheads in this tunnel, the innermost one being about 250 feet from the portal and the outer one about fifty feet in. According to the guards, Lopez was heard moving timbers at the inner bulkhead.

It was noticed that there was an inward draft at this point. The draft upward has been so great that it drew air in through this entrance. If Lopez were there he would be in fresh air. Dr. Straup expressed the belief, however, that the guards had heard the timbers warping, due to the water in the tunnel.

Shortly before the smoke started Lopez was heard at the Andy bulkhead. Later he was heard in the 700 level far below. Last night he was heard at the Phoenix No. 2 if he made all those trips, part of the time would have been through the sulphur fumes. For this reason it is believed that other noises have been heard by at least some of the guards. The only other theory is that another man is in the mine. It is not believed now that Cranovich is in the mine.

Persistent rumor had it that Mike Cranovich, the Austrian who is a fugitive on a charge of kidnapping, had escaped prior to placing the bulkheads in the tunnels of the mine. It was reported frequently during the day that friends of Cranovich had smuggled him out of the mine on Saturday or Sunday and had him hidden in a cabin. The mine operators say that such an escape might have been made prior to the bulkheading, but that there was no possibility of escape subsequent to the bulkheading. On the other hand, there are a number of friends of Cranovich who say that the fugitive has never been in the mine and that he is now working in a coal camp in Carbon county. Mrs. Cranovich, Sheriff Smith said last night, is recovering from her injuries and refuses to swear to a complaint or to testify against her husband. In the event that Cranovich is captured, the sheriff said, it is more than probable that he would not be prosecuted.

Sheriff Urges Caution.
When it was decided last night that the mine shall be opened tomorrow and the search for Lopez or his body again started, Sheriff Smith again told the deputies that it was his orders that no man should rush into the mine and that every precaution should be taken to protect the life of the man hunters. Sheriff Smith has insisted that no chances should be taken by his men, and he has flatly refused to allow any move which would be liable to jeopardize the lives of the men under his orders.

Black damp, the most dreaded enemy of the miner, is now pursuing Raphael Lopez in his tomb. The Apex mine. Last night 500 pounds of black powder and three tons of soft coal were taken to the scene of the smudging operations. Soon the coal smoke was uniting with the smoke from the dampened powder and the heavy fumes began creeping into the hoist and up toward Lopez' lair.

Black damp has a characteristic of sinking when it cools. It will therefore cover not only the upper part of the various tunnels and stopes, but will sink below. Dr. F. E. Straup and others who understand the nature of the sulphur fumes contend that it is very possible that they have not affected Lopez. They say that the fumes have a tendency to rise when over water. As the tunnels in some places have water in them ankle deep, they believe that Lopez may have an air space from a few inches to a foot or more in width. But the heavy black damp will sink down to the bottoms and complete the destructive atmosphere.

A possible plot to give Lopez not only ventilation but an opportunity to escape was discovered yesterday afternoon. When Patrolman A. S. Thompson of Salt Lake a number of Mexicans were throwing dirt against the bulkhead at the portal of the Parnell tunnel to shut it tight so the fumes could not continue to escape through crevices.

Patrolman A. M. Jukes of Salt Lake heard taps and thinking possibly it was Lopez or Cranovich, answered them. He said he heard four taps first and answered with two. Then he said four more came and he answered with three. Again he said he heard the four and he said the hoist engineer gave two. These conform with the taps heard by Patrolman Jukes, Sheriff T. A. Devine, Patrolman H. A. Olson and Juvenile Officer George Robinson, who were on duty at the Andy tunnel.

"There is no question that we heard the tapping yesterday morning," said Sheriff Devine yesterday. "It was not imagination. Of course we couldn't tell just where they came from, but we heard them beyond any doubt. I looked at my watch and timed them. They all came between 3 and 3:10 a. m."

Patrolman H. A. Olson, in charge of the posse at the Andy tunnel, said he heard noises in the tunnel before the taps, before midnight. He said there was a scraping noise, as though Lopez were feeling his way along the pipes.

C. C. Rucker, who was in charge of the posse in the 700 level where Miller was stationed, said they undoubtedly heard the taps, but he could not say as to whether Miller or the hoist engineer answered them. He did say, however, that he was positive that they had also heard

tapping on one of the bulkheads in the 700 level. He said they were very distinct.

"I am positive that someone was on the inside of the bulkhead pounding on it," said Rucker. "There is no question about it. And the pounding was deliberate."

According to Sheriff Smith, Superintendent V. S. Rood of the Apex mine, is satisfied that the tapping was done by the miners on the 1100 level, which is the Parvuu. He said the miners probably thought it was signaling and therefore answered it. Julius Corrallo, who has worked with Lopez in the Andy tunnel, doubts whether tapping even from the 700 level could be heard in the 300 or Andy.

"I have often tried to signal from the 700 level up to the Andy on the pipe that runs through the hoist," said Corrallo to a Tribune reporter. "I have never been able to make such signals heard. However, I always signaled when the hoist was running. With the hoist out of operation the mine would be more quiet and it may be that the tapping could be heard."

Four Austrian miners who went in to the Andy tunnel yesterday afternoon to fill the crevices in the bulkhead were overcome by the sulphur fumes. One was able to grope his way out and inform the men outside. The other three were carried out. Milton Burns and Jack Ayres, workmen for the Utah-Apex, each carried out a man and Deputy Sheriff C. L. Schettler and Al Bouch went in and with some difficulty rescued the fourth man.

Last night every miner was out of the entire Apex property including the Utah-Apex, the Phoenix and the Minnie mines. The men working on the 1100 level, or Parvuu, were ordered out because it was feared the black damp, which was rapidly sinking, would overcome some of them. No miners will go back to work until the fresh air is turned in Thursday.

It was rumored here last night that the miners would present a bill for their time to the county. There are about 225 of them at \$4 an eight-hour shift. This would add an additional expense of more than \$1000 to the expenses of the chase. On account of this it is said the tunnel will only be kept sealed until tomorrow morning.

The latest rumor of the hundreds that have come to the camp since the hunt in the mine began was started at an early hour this morning. It was reported that the Mexican had been seen in a car on the Highland Boy tramway. The tramway runs over the hill to Tooele. No credence was given to the rumor in official circles. Bets are being made that the body of Lopez will not be found in the mine.

Sheriff T. A. Devine of Weber county and ex-Sheriff M. M. Bush of Tooele county went to the 975 level of the Phoenix mine late last night to guard that portal. It was reported that the men who were on guard when they believed they heard Lopez working his way out cannot be found in the camp or on the hills.

LYMAN FRAUD TRIAL HALTED

Los Angeles, Dec. 2.—The trial of Dr. John Grant Lyman, charged with misuse of the mails in connection with land deals in Panama, came to an abrupt halt today while Judge Wellborn of the United States district court inquired into published intimations that the jurors had been approached.

Counsel for Lyman called the court's attention to the newspaper articles declaring there was no truth in them. Edward A. Ragan, special counsel for the government, said there had been no suspicion of communication between the jurors and the defense, but counsel joined in stating their belief that the published rumors had made it impossible to continue with the present jury. Judge Wellborn ordered a recess while he considered the advisability of ordering a new trial.

MRS. ELLA KELLY DIES.
Springville, Dec. 2.—Mrs. Ella Kelly, wife of T. R. Kelly, of this city, died here last night at 11:40 o'clock after being ill for the past three months. The cause of death was a cancer. She underwent an operation some weeks ago at the Provo hospital, which appeared to be successful for several weeks, when new complications developed. She leaves four small children, two sons and two daughters. The funeral will be held Thursday afternoon from the home.

The infant son of Mr. and Mrs. William Mason died this morning of bronchitis, after an illness of four days.

DRAINAGE OF LANDS IN VICINITY OF SYRACUSE

Farmers in the vicinity of Syracuse Layton and Clearfield have all their plans completed for reclaiming their waterlogged land. The contract for the draining has been let to local drainage contractors, and work of putting in miles of the drain will be started at once, according to Guy A. Hart, assistant drainage engineer in charge of the federal drainage investigation for Utah. Mr. Hart yesterday inspected the land.

Although the drainage was suggested by the federal department, none of the work is being done by the government, the farmers having banded themselves together to pay the expense of the work. Mr. Hart is of the opinion that the increase in crops on the land to be reclaimed during the next season will more than pay for the drainage work. He declares the land near the three towns the best he has ever seen, but says that too much much alkali that it has rapidly depreciated as a crop producer and that last season's yield amounted to almost nothing.

The principal work is being done in the neighborhood of Syracuse, where about twenty farmers have organized. At Layton and Clearfield the land owners are slower to take up the club plan, although it is thought they will come to it soon. In all, about 1500 acres of good land will be made valuable.

The next move of the government drainage department in Utah will be to put in the new concrete tile drainage system near Huntington, Emery county. On the government expert tract, which comprises about forty acres, some of these drains have already been established. These are the first of their kind to be used in Utah, and although they are much heavier than the old style, Mr. Hart is of the opinion that they will produce excellent results. In discussing the reclamation of the Emery county land he said yesterday:

"The land down there, while it contains alkali and is practically useless, is in much better condition than it was seven years ago. At that time the large amount of water in it had forced alkali to the surface until it stood from an inch to an inch and a half on top of the ground. It was flaky, like snow, and when you walked on it crunched under foot."

The government started work there at that time, but instead of good tile drains being put in, they used the wooden type without bottoms. Because of the long haul from Price, there was so much water in the ground that the drains were stopped up and did not work properly. However, enough of the alkali was carried off so that only a trace remains now above ground. With the new cement drains we expect to make the land productive. It is now stronger in alkali than any other land in the entire country."

WOMEN TO HAVE BUDGET SYSTEM

Suffragists May Adopt New Constitution on Broader Plan—Some Opposition.

Washington, Dec. 2.—Chief interest in the second day's session of the convention of the National American Woman Suffrage association was in the discussion of a new constitution for the organization. The purpose of a change in constitution, it was explained, was to give the association a budget system. Money for carrying on the work hitherto has been raised by subscriptions. Reports of credentials, ways and means, church work, congressional and other committees, took up the morning session. The committee which drew up the new constitution was also ready to report.

Despite the optimistic views of those leading the new movement, however, there was talk of opposition when the suffragists got down to work today. Some of those who had become most radically opposed to the new plan were urging other delegates to join a movement to form a coalition with those favoring the plan, however, were confident all differences would be removed and that all forces would finally be united to work in harmony for the cause.

TROOPS ARE NOW ON THE BORDER

El Paso, Texas, Dec. 2.—The Twentieth infantry is tenting tonight on the Mexican border with full field equipment, ready to march south at a moment's notice.

The fighting Twentieth arrived on four special trains this afternoon from Salt Lake City by way of Colton, Cal., and was immediately ordered to detain down town and take stations along the Mexican border opposite Juarez.

The various companies and battalions are stationed along the river bank of the Rio Grande tonight and the "Halt, who comes there?" of the sentinels may be heard plainly on the Mexican side, together with the "Alto quien vive" of the Mexican rebel troops. The trains arrived here at 3 o'clock this afternoon with the regimental band playing "The Girl I Left Behind Me" and the splendid fighting machine of the Twentieth regiment cheering as the rugged peaks of the Mexican mountains became visible from the train.

Met by Major Michie.
The regiment was met at the Union station by Major Robert E. Lee Michie, brigade adjutant, who ordered Lieutenant Colonel Frederick W. Perkins to have his men detain along the border and go into camp wherever convenient.

been doing patrol duty, will be relieved at once and will proceed to Fort Bliss, leaving the brunt of the border patrolling to the Fort Douglas regiment.

The Twentieth presented a warlike appearance when it marched to the camp grounds along the sandy banks of the border river. Each officer carried his field glasses, revolver, haversack and dispatch pouch, and every man had his Springfield rifle, blanket roll, canteen, trenching tools and haversack. One company of the Twentieth was detailed to guard the Santa Fe street bridge from Ciudad Juarez and another was stationed at the Stanton street bridge to search all vehicles and persons crossing the bridge to Mexico.

Only Two Stops Made.
The remainder of the regiment will patrol the river bank through the city and will watch for ammunition smugglers and gun runners going to the Mexican side.

The regiment came through from Salt Lake without mishap except that every kitchen car on each of the four trains caught fire from the four ranges on the way. The fires were extinguished by the soldiers and no damage was done except to the meals which were cooking.

A stop was made of four hours at Colton, Cal., where the trains were switched to the main line of the Southern Pacific. A stop was also made at Tucson, Ariz., so that the stock might be watered and the officers and men given a chance to exercise their legs. Not a soldier or officer was ill coming from Fort Douglas to El Paso and the men were declared to be the fittest body of fighting men yet seen on the border by one of the commanding officers at Fort Bliss.

CHICAGO STREET CAVES 175 FEET

Chicago, Dec. 2.—Randolph street rose tonight, lifting street cars full of people on its surface, then slowly sank, broken, leaving a cavity 175 feet long, nearly as wide as the street and between eight and ten feet deep. The unique accident occurred directly in front of the new structure of the Marshall Field building at Randolph street, about midnight.

It took four minutes for the rise and fall of the street surface. During that period seven street cars running onto the heaving and sinking pavement crossed in safety with their loads of passengers.

Nether the specific cause nor the total effects of the accident could be explained. A twenty-four inch water main burst about ten feet below the pavement, but whether that was the cause of the accident or merely an effect is a question which engineers still have to solve.

Engineers also have before them problems yet more grave. A great soil disturbance between two such buildings as the Marshall Field structure on one side and the Masonic temple on the other may present serious phases. Whether the foundations of these mighty buildings have been affected and whether they remain firm as before is one of the immediate questions.

The question next in importance is whether the Illinois Tunnel company's bore, lying at the third level under the street, was injured or seriously endangered. Out of the midst of the questions arise many surface facts.

BANDIT KILLS A BANK CASHIER

Blythe, Cal., Dec. 2.—Two robbers entered the Palo Verde Valley bank here, at 3 o'clock this afternoon, shot and killed Cashier A. W. Bowles, after robbing the bank of \$5000 in gold and currency, and escaped.

Cashier Bowles was alone in the bank when the men walked in through a rear door a few minutes before 3 o'clock. Forcing Bowles to put up his hands, they grabbed all the money in sight, stowing it away in their pockets and inside their shirts, and then made a dash for their horses, with Bowles in pursuit.

Gaining the street, Bowles caught up with one of the robbers and attempted to hold him as he called for help. The bandit drew a gun and shot the cashier through the neck.

The two robbers quickly mounted and rode south into the mesquite jungles bordering the Colorado river. Bowles died half an hour later.

The little town was thrown into a turmoil by the tragedy and a posse of ranchers and cowboys was quickly organized, and within fifteen minutes had started in hot pursuit of the bandits.

The southwestern headquarters of the Burns Detective agency in Los Angeles was notified by telephone of the robbery and tonight a posse of detectives in automobiles had started for the scene.

Reports from the cowboy posse tonight indicate that they are close on the trail of the robbers, and a pitched battle is expected any moment.

Ogden, Utah

That Nickel of Yours

Did you ever stop to think how many people are after it? There's the street car company, the moving picture man, the news stand, the cigar man, the soda fountain man, and an army of others.

They all want that nickel, and the one who gets it will be sure to add it to his bank account.

Why not bank it yourself?

MEAT INJURIOUS TO THE KIDNEYS

Take a tablespoonful of Salt if Back hurts or Bladder bothers.

We are a nation of meat eaters and our blood is filled with uric acid, and a well-known authority, who claims to be constantly on guard against kidney trouble.

The kidneys do their utmost to free the blood of this irritating acid, but become weak from the overwork they get sluggish; the eliminative they clog and thus the waste is retained in the blood to poison the entire system.

When your kidneys ache and feel like lumps of lead, and you have stinging pains in the back or the urine is cloudy, full of sediment, the bladder is irritable, obliging you to seek relief during the night; when you have severe headaches, acid stomach or rheumatism in bad weather, get from your pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast each morning and in a few days your kidneys will act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush and stimulate clogged kidneys, to neutralize the acids in urine so it is no longer a source of irritation, thus ending urinary and bladder disorders.

Jad Salts is inexpensive and cannot injure; makes a delightful effervescent lithia-water drink, and no body can make a mistake by taking a little occasionally to keep the kidneys clean and active. Advertisement.
